BLS 201 SERIES

TWIN DUST FILTERS WITH BAYONET CONNECTION

BLS 201 series filters are a very light alternative of the traditional dust filters in rigid canister. They are FFP3 R classified and protect from dusts, fibers, fumes, aerosols of toxic particles; also available with activated carbon for nuisance odours. They are compatible with all BLS half masks and full face masks with **b-lock** bayonet connection.

LIGHT AND SMALL SIZE

BLS 201 series flat filters are characterised by a lightweight design and reduced size. Features that are appreciated both in use and in transportation. Thanks to their slim profile they ensure a wide field of vision. Besides, they are particularly fit for welding applications since they are compatible with the use of a welding mask.

b-lock BAYONET CONNECTION

This connection is highly intuitive allowing a quick and safe hold on the mask. It has a locking feedback allowing the user to know if the filter has been properly placed.

DUST FILTER

Filtering efficiency is 99,99%. The integrity of the filtering material is ensured by a protective mesh.

AVAILABLE WITH ACTIVATED CARBONS

They can be used with acid and organic gases vapours and ozone below the Threshold Limit Value (TLV), specific for every substance.

CERTIFICATION

BLS filters are:

- Certified according to European Regulation 2016/425 (Personal Protective Equipments)
- Certified as PPE of III category, in presumption of conformity to harmonized standard EN 143:2000 + A1:2006
- Certified and controlled according to Annex D by CIOP-PIB. (Notified Body n°1437)
- CE marked

BLS management system is ISO 9001 certified
